

Satellite Radio provides music and news that I am willing to pay a monthly fee to receive. I prefer to listen to Satellite Radio instead of the local AM and FM stations, for quality, variety, dependability. The National Association of Broadcasters petition 04-160 should be rejected. Satellite radio should be free to provide the programming its listeners want.

The FCC should be interested in providing all listeners with as much traffic and weather information as possible over what ever medium they choose.
